THE DATA MINE

Infinite Opportunity

600+
EXCEPTIONAL UNDERGRADUATE AND GRADUATE STUDENTS FROM ALL MAJORS

300+
HOURS EACH STUDENT INVESTS ON PARTNER PROJECT PER ACADEMIC YEAR

1 GOAL
EMPOWERING THE NEXT GENERATION OF DATA SCIENTISTS

Data is the new oil. How is your organization leveraging the world's most valuable asset?

The Data Mine at Purdue University is a pioneering living and learning community for undergraduates from all majors. In this unique, interdisciplinary environment, students learn to harness the power of data — engaging analytical and creative thinking — to help you devise solutions for your business needs.

As a core part of the University's Integrative Data Science Initiative, The Data Mine is a central hub for data-infused education, research, engagement and collaboration. We're equipping students to tackle real-world problems by thinking out of the box. Turning data into insights, and imagination into reality.

PURDUE UNIVERSITY

INNOVATIVE APPROACH

Our students. Your projects.

THE DATA MINE AT A GLANCE

A VISION

The first data-intensive experience embedded in a large-scale living-learning community for students from all majors.

A DEPTH OF KNOWLEDGE

Students apply knowledge of tools, including R, SQL, Python and Linux clusters, and (in some cases) advanced tools for projects requiring AI and machine learning.

AN INNOVATION ENGINE

Interdisciplinary teams bring new perspectives to tough problems, where data science is a key part of the solution.

The Data Mine is seeking corporate partners to join us in advancing data science through collaboration, education and research. Working with peers and mentors, Data Mine students use an Agile approach for practical solutions to your immediate needs, while also making strides to revolutionize data science. The opportunity is endless.

CORPORATE PARTNERSHIPS:

Sponsored Research Partnerships

- Contract-based engagement
- Cost, time and number of students tailored to your needs

Tier I

- $40,000 per academic year
- 25 students
- 2 or more projects

Tier II

- $20,000 per academic year
- 5 students
- 1 project

Partnering with The Data Mine

Industry leaders such as Caterpillar, Cummins, Ford and Merck have already seen the benefits of partnering with The Data Mine.

THESE BENEFITS INCLUDE:

- A pathway to Purdue's vast data science ecosystem.
- Campus presence and access to state-of-the-art facilities at Convergence in Discovery Park.
- Access to top undergraduates with training and structured experience in applied data science.

DOES MY PROJECT MAKE SENSE FOR THE DATA MINE?

- Does it have a clear, aspirational, data-driven problem?
- Could it benefit from Purdue's computing resources?
- Do you have domain-specific analytical challenges where multiple approaches are viable?

"It sounds a little odd to say, but the best part of The Data Mine was the work … [It] pushed us outside of our comfort zone — and learning how to use new technologies was extremely intriguing and illustrative of how real-world projects would utilize these very tools."

BECK'S HYBRIDS

Beck's is the third-largest seed brand in the United States, serving farmers across the Midwest and using the strength of their supply chain to provide customers access to the best genetics and trait technologies from suppliers worldwide.

THE RIGHT DATA, THE RIGHT PRODUCT – THE RIGHT WAY

Beck's is customer-driven to the core. Nimble. Forward-thinking. Always striving to meet customer needs.

When Beck's approached The Data Mine, they didn't want to change their customer-first attitude. Instead, they wanted to know, "How can we make it even better?" The Data Mine brought together an interdisciplinary group of students, providing fresh perspective and insight to new technology. It also put Beck's on the radar for recruitment, giving them a leg up against the competition when they're hiring.

Teaming with The Data Mine created a two-way exchange, allowing Beck's to instill their values in potential future employees while also learning how improved data analysis could better anticipate market fluctuation. The end result: Beck's is better positioned to deliver the right product to the right place at the right time.

Bringing together top companies and tomorrow's talent to create new opportunity — that's what The Data Mine is all about.

"Our original goal of collaborating with The Data Mine was simply to expand our network — building a talent pipeline with such a prestigious university can be challenging. And we accomplished that. But we quickly realized we were working with some amazing students, smart folks who were engaged and motivated. They created this consortium of people, with different skill sets, for a team that was custom-built to look at our problems."

BRAD FRUTH, *Director of Innovation, Beck's Hybrids*
